EXPERIENCE

Front-end Developer, Freelance, Ukraine

Jan 2023 — Current

- Developed responsive landing pages and commercial websites for various industries, including online entertainment, e-commerce, and service-based businesses
- Built modern user interfaces using React, Next.js, TypeScript, and Tailwind CSS
- Created scalable admin panels and dashboard systems with complex forms and data management functionality
- Integrated payment systems and third-party services, including Stripe, PayPal, Telegram bots, analytics tools, and CRM solutions
- Implemented multilingual support and localization systems for international projects
- Worked with REST APIs, asynchronous requests, authentication flows, and dynamic content rendering
- Developed reusable UI components and optimized application architecture for maintainability and scalability
- Integrated and customized external libraries, animations, sliders, charts, and interactive UI solutions
- Focused on responsive, cross-browser compatible, and SEO-friendly development
- Collaborated directly with clients, designers, and backend developers throughout the full development lifecycle
- Optimized website performance, loading speed, and user experience across desktop and mobile platforms

Front-end developer, FundShop, North Fort Myers, FL, USA

Mar 2025 — May 2026

- Developed and maintained company web projects, including landing pages, business websites, and internal platforms
- Built websites from scratch, starting from project structure and frontend architecture to final deployment
- Participated in refactoring and modernization of existing applications to improve maintainability and performance
- Developed CRM systems and admin panels with dynamic interfaces and data management functionality
- Created responsive and cross-browser compatible user interfaces based on design specifications
- Integrated APIs, third-party services, and external libraries into company products
- Worked on frontend optimization, code scalability, and reusable component architecture
- Collaborated with designers, backend developers, and stakeholders throughout the development process
- Implemented new features, fixed bugs, and continuously improved existing functionality

Front-end React developer, Geekle Us., Wilmington, DE, USA

Jan 2023 — Jan 2025

- Led frontend improvements and optimization initiatives across existing web platforms
- Contributed to building scalable frontend architecture for new projects
- Refactored legacy codebases and introduced modern development practices
- Improved application maintainability, performance, and development workflows
- Enhanced project structure and component reusability for faster feature delivery

EDUCATION

Byte IT Education, Kyiv

2022 — 2023
